

Boston Local Market Symposium

A Green Roofs for Healthy Cities Event

Green Roofs for Healthy Cities welcomes you to the Boston Green Roof and Wall Symposium on May 31st at the Jonathan Spack Community Conference Center.

Boston is a market that represents a tremendous opportunity for green implementation, and like many cities along the eastern seaboard, has a myriad of stormwater management concerns that need to be addressed.

This one day event will feature industry experts and local policy and research leaders presenting design best practices, the latest research findings, exceptional projects, and policies on green roofs. The Symposium will also feature a trade show for local green roof and wall companies, interactive panel discussions and workshops to help develop policy locally.

Why attend?

- Discuss green roof and wall policy in the Boston metro area.
- Approved for 7 AIA, ASLA, and GRP CEUs.
- Tour the Boston Medical Center green roof.
- See how to make the business case for green roofs and walls.

Thank you to our event sponsors
