

Re-imagining Living Architecture:

Water Management & Beyond

Presented By:

Green Roofs for Healthy Cities and the Greater Ohio Living Architecture Center welcome you to the Re-imagining Living Architecture Seminar on May 21st at the Cleveland Urban Design Collaborative.

Cleveland is a prominent emerging green infrastructure market in North America. With highly developed stormwater policies in place, Cleveland is now looking at advanced implementations of green roof and wall technologies to meet its sustainability goals.

This one day event will feature industry experts and local policy and research leaders presenting design best practices, the latest research findings, exceptional projects, and policies on green roofs. The Seminar will also feature a trade show for local green roof and wall companies, and an interactive panel discussion on the state of Cleveland's green roof policy and incentive programs.

Why attend?

- Discuss green roof and wall policy in the Northeast Ohio area.
- Learn about green roof design best practice.
- Approved for 7 AIA, ASLA, and GRP CEUs.
- See how to make the business case for green roofs and walls.

Thank you to our event sponsors
